A horizontal rectangular box with a light blue background and a thin border. The text 'MediaViewer' is centered in a bold black font. The background of the box features a faint, abstract pattern of grey circles and lines, resembling a molecular or network structure.

MediaViewer

MediaViewer is the software that provides the capability to monitor and manage multiple playouts.

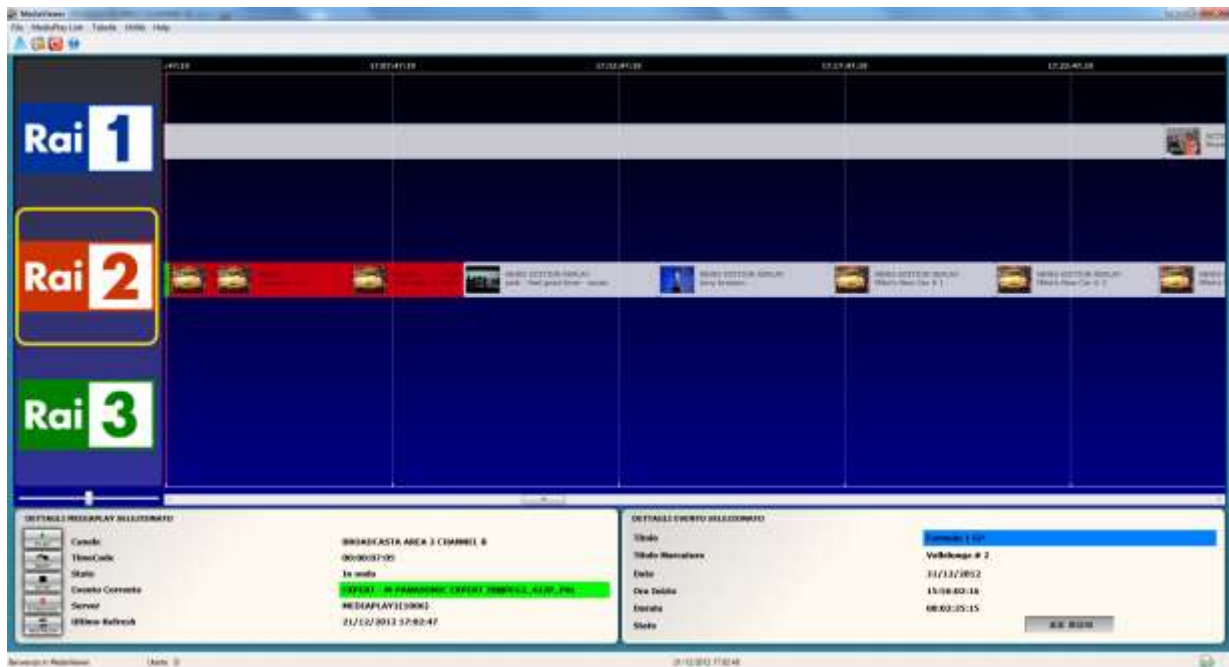

This module has been developed in order to respond to the requirement of many broadcasters for a powerful tool with a very simple interface that is able to manage more channels at the same time and using the same GUI.

With this software is possible to manage more channels at the same time, do any type of changes on the fly like and modify the Playlist of any channel right up to the last second.

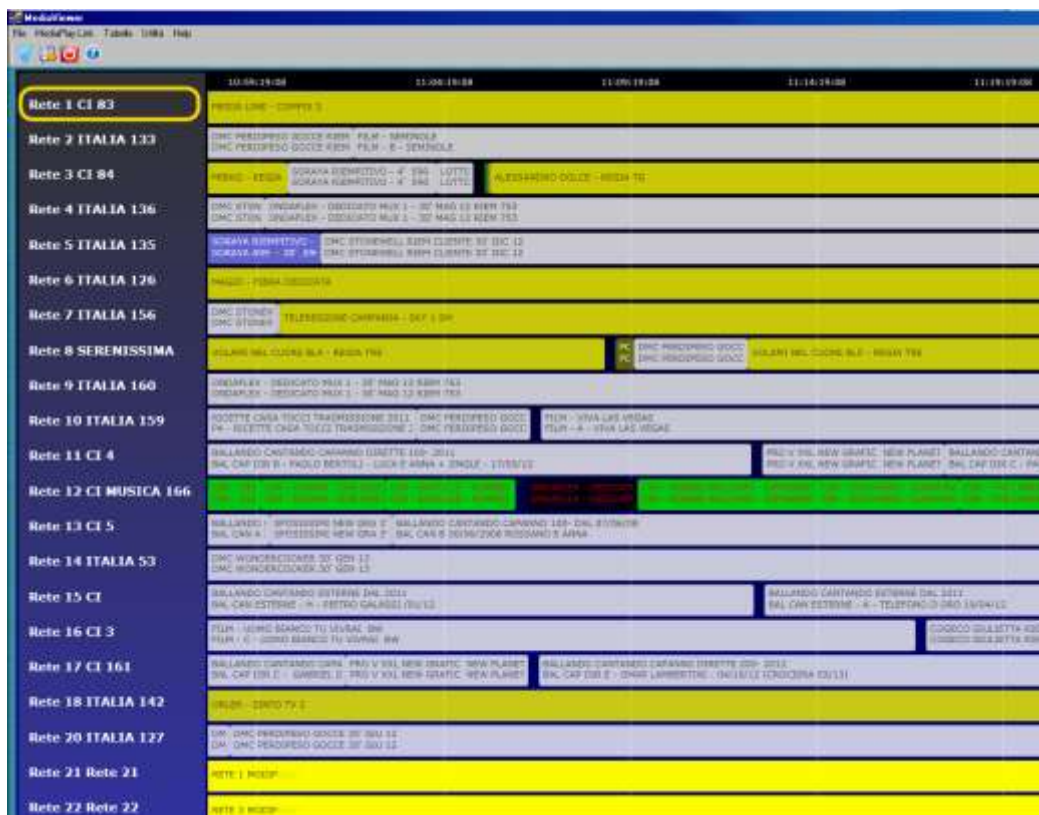

MediaViewer is able to control all the devices that are incorporated in the playout system of the channels under its control: A/V router, logo generator, VGC, video mixer, etc.

Key Features:

- ***User friendly GUI***
- ***Skip (Next) command for all events***
- ***Standby command for live events***
- ***Multiple channel management on the same screen***
- ***Automatic check of playout system components with error alerting***
- ***Password protected Windows application with Keypad lock***
- ***Customizable to meet individual workflows***
- ***Integrated with MediaList, MediaStore.***
- ***Integration with third parties Traffic Systems***
- ***GPI signal receiver***
- ***Easy to use and User friendly GUI***
